Professional Summary

Backend-focused Software Engineer with **3+** years of experience building scalable and reliable systems using **Java**, **Spring Boot**, **Spring Batch**, **Hibernate**, and **SQL**. Proven ability to design RESTful APIs, automate high-volume data pipelines, and improve lead conversion and system efficiency in production environments.

Work Experience

- Software Engineer** July 2023 – Present
Magicbricks Bangalore, India
 - Engineered an event-driven **Spring Batch and Kafka** pipeline integrating GenAI floor-plan generation, syncing 3D visual assets via Amazon S3 and Apache Solr across core discovery pages (SRP, LDP, PDP)
 - Engineered **MagicQL**, an internal **AI-driven English-to-SQL platform** built with Spring Boot, React.js, and ClickHouse DB, enabling non-technical stakeholders to independently query high-scale analytical databases.
 - Architected **PropAvatar AI** using Spring Boot, React.js, and Cartesia AI, transforming short agent videos and voice recordings into interactive digital twin avatars capable of delivering project walk-throughs and real-time QA.
 - Developed an in-house **AI interior design service** using Spring Boot, OpenAI APIs, and Amazon S3, replacing third-party APIs to dynamically generate customized room concepts from user reference preferences.
 - Designed backend systems for a centralized **Content Management System (CMS)** enabling secure media storage and retrieval using **Amazon S3**.
 - Developed a custom CRM platform for sales agents and Relationship Managers (RMs) to track leads, manage follow-ups, and streamline communication workflows.
 - Built a **brand recommendation system** using business rules and micromarket data to surface top interior brands based on user budget and preferences.
 - Engineered a **dynamic quotation and cost estimation engine** that calculates interior project budgets based on size, material, finish, and hardware parameters.
 - Improved mobile site engagement, increasing lead traffic by **5–10%** through enhanced user experience and design exploration capabilities.
 - Built and maintained backend services in a **microservices-based architecture**, ensuring transactional consistency and fault tolerance across distributed systems.

Technical Skills

- Backend:** Java, Spring Boot, Spring MVC, Spring Batch, Hibernate, REST APIs, Microservices
- Messaging & Data:** Kafka, SQL, Apache Solr, Batch Processing
- Frontend:** React.js, JavaScript, HTML, CSS
- DevOps & Cloud:** Git, Jenkins, Linux, Amazon S3
- Tools:** VS Code, Postman, IntelliJ, Putty
- Soft Skills:** Problem Solving, Team Collaboration, Time Management, Communication

Education

- National Institute of Technology** Nagpur, India
B.Tech in Computer Science and Engineering – CGPA: 7.71/10 July 2019 – May 2023
- Narayana Junior College** Hyderabad, India
12th Grade (Science) – 98.6% June 2017 – May 2019

Achievements

- Recognized with the **Gold Star Award** for outstanding performance in quarters **AMJ-25**, **OND-24** and received the **'You Did It'** award for exceptional contribution in **JAS-24**.
